

ADITYA MOROLIA

CSE Student — Undergrad Researcher (Quantum Computing) at C-STAR, IIIT Hyderabad

✉ aditya.morolia@research.iiit.ac.in in aditya-morolia 📞 TheCharmingSociopath 📷 Aditya Morolia

EDUCATION

B.Tech in Computer Science and MS by Research in Computational Natural Sciences

IIIT Hyderabad

📅 July 2017–Present

📍 Hyderabad

CGPA: 8.65

WORK EXPERIENCE

Summer Employee

Goldman Sachs

📅 June 2021 - Present

📍 GS Bengaluru, India

- Work in the Secdb Architecture team

Technical Staff

AlCrowd

📅 April 2020–July 2020

📍 WFH

- Built a simulator for the purpose of hypothesis testing on our reputation and ranking system in **Python**, then added features on the basis of the observations to the **Rails web app**
- After **winning** the campus **Reinforcement learning** challenge DroneRL, I was responsible for creating a new in house RL challenges.
- Developed a new **Django web app** named AlCrowd classrooms.

Teaching Assistant

IIIT Hyderabad

📅 Jan 2020–Present

📍 Hyderabad

- Linear Algebra, Spring 2020 (UG1) and Monsoon 2020 (H2, PG1)
- Introduction to Quantum Information and Computation, Spring 2021 (H2, Elective)
- Responsibilities included taking tutorials, setting the assignments and projects, paper corrections and working with students on their projects.

SysAdmin

Felicity, IIIT Hyderabad

📅 Dec 2018–Jan 2019

📍 Hyderabad, India

- Responsible for deploying the websites and utility services like the mailtrain on our server.

Mobile App developer

BUILDtheWorld

📅 April 2019–June 2019

📍 THub, Hyderabad, India

- Developed various features for the **React Native** mobile app

RESEARCH EXPERIENCE

Research Assistant

International Institute of Information Technology (IIIT) Hyderabad

📅 May 2019 - Present

📍 Hyderabad, India

- I work with Prof. Indranil Chakrabarty on Quantum Physics and Quantum Information.
- I work with Prof. Shantanav Chakrabarty on Quantum Algorithms for Linear Algebra and Machine Learning

Visiting Research Student

Harish-Chandra Research Institute (HRI) Allahabad

📅 Dec 2019 - Jan 2020

📍 Allahabad, India

- Took up a research project on Quantum Coherence and tunnelling advised by Prof. A. K. Pati.

Honours Project

International Institute of Information Technology (IIIT) Hyderabad

📅 January 2021 - May 2021

📍 Hyderabad, India

- Project on Ranking and Matchmaking algorithms and Monte Carlo Markov Chain Sampling under Prof. Girish Varma.

Research Intern

Indian School of Business (ISB), Mohali

📅 June 2019–August 2019

📍 WFH

- Work on basketball game data collection and data analysis with Dr. Siddharth Sharma to derive relation between team performance and pollsters' predictions.

Summer School on Quantum Computing and Quantum Information

Indian Statistical Institute (ISI) Kolkata

📅 May 2019

📍 Kolkata, India

- Summer school was taken by Prof. Guruprasad Kar and his team at PAMU, ISI Kolkata.
- Studied the formalism of quantum mechanics, no cloning, entanglement detection and resource use, key generation and distribution, non-locality, quantum information theory and processing, bell's theorem, quantum cryptography, and quantum computation.

PROJECTS

Face Classification and Verification | *Python, SKLearn*

January 2021

- The project work included depth understanding as well as implementation of computing eigen-faces required to satisfactorily reconstruct a person in the given dataset (combining 3 different datasets), Face Recognition using kernels and classifiers, Visualization of faces using t-SNE and Face Verification.

Distributed MapReduce | *C++, Boost, MPI*

April 2021

- C++ implementation of the MapReduce library to handle MapReduce tasks on a distributed system. This library handles worker failures and performs load balancing.

COVID-19 Vaccination Management | *Django, Python, HTML, CSS, JavaScript*

April 2021

- Wrote a Django WebApp to manage the complete vaccination pipeline. Includes an algorithm to automatically distribute vaccines to states and districts on the basis of Population, number of vaccination centres and rate of change of number of active cases.

C- - Compiler | *C++, Antlr*

November 2021

- Compiler for a toy language C- inspired by C and Decaf. Includes a parser made using Antlr, custom syntax tree construction using Visitor Design Pattern, and LLVM IR generation.

Automated Bidding Agent | *Java*

November 2020

- Made an automated bidding agent for targeted Ad space using Java to compete in a second prize sealed bid auction under limited budget constraints.

Beginner's AI notebook | *Python, SKlearn*

October 2020

- Implemented standard ML algorithms, including backpropagation, classification and data representation, SVM and kernel tricks along with AI course.

Question Generation from a given corpus using NLP | *NLTK, Spacey, gensim*

October 2020

- Designed a question generator from the corpus of Science textbooks using NLTK, Spacey, gensim involving concepts of Named Entity Recognition and word2vec in **24 Hours** in a team of 4 for a hackathon

Linux Shell | *C*

October 2020

- Developed a terminal based shell using C that supports piping, I/O redirection, signal handling, background and foreground process management, etc.

Molecular Dynamics Simulation | *Python*

October 2020

- Python script to simulate molecular dynamics to calculate macroscopic properties like temperature and pressure using **Minimum image convention** and **Periodic boundary condition** using **Monte Carlo Markov chains methods**

Xv6 Schedulers and updates | *C*

October 2020

- Implemented MLFQ, FCFS and Priority based scheduling, along with several other functionalities for Xv6 OS

Connect RJ/VJ Mobile App | *React Native*

October 2020

- Project involved the development of a mobile platform that allowed people to portray their RJ/VJ skills.
- Designed and developed a prototype application using React Native.

Game Development with Graphics Libraries | *OpenGL (C++) and WebGL (JavaScript)*

October 2020

- Developed a replica of games like JetpackJoyride and SubwaySurfers using OpenGL (C++) and WebGL (JavaScript) graphics libraries
- Implemented object-oriented programming practices such as inheritance to create different account types and databases.

SKILLS

Programming and scripting: C, C++, Python, Javascript, Bash, Java

Web and Mobile: HTML5, Bootstrap, Django, ReactJS, React-Native, Flask

Misc.: Linux, Git, Docker, Postgres SQL, MySQL, Qskit, Sklearn, Pytorch, Scipy, SageMath, Latex, Golang, Neo4j

CO-CURRICULARS

- Corporate Relations Head, E-Cell, IIIT-H April 2019 - May 2020
- Marketing Head, Felicity, IIIT-H June 2019 - May 2020
- Literary Club Coordinator, IIIT-H July 2018 - July 2020
- Kickboxing Regional Title Belt winner June 2015
- Boxing, Swimming, Drumming
